

FLEXMOD EXHIBIT

The **Altair** Collection is purpose-built for flexibility. The 20x20 Altair is best suited for a perimeter or peninsula booth (with a wall or a booth behind it), but with the addition of an oversized graphic on the back, it can be converted to an island booth. The versatile elements can be reconfigured for 10x30 and 10x20 booths.

The Altair Collection contains two Satellite exhibits that function independently: the 20' Comet and the 10' Meteor.

Transorbital Features of the Altair Collection:

- Perimeter or peninsula booth
- Converts to island booth
- Video presentation capability
- Reconfigures to 10x30 and 10x20
- Two satellite exhibits: 20' Comet and 10' Meteor

Satellites

Satellites orbit independently.

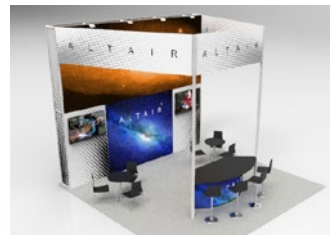

Comet 10' x 20'

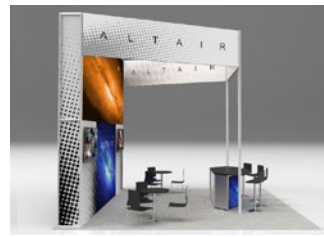

Meteor 10' x 10'

The Altair Collection

Altair: A very bright, variable binary star in the constellation Aquila, approximately 15.7 light years from Earth.
